PRICE INCREASE ANNOUNCEMENT

Dear Valued Customer,

A strong increase in the price of antimony, a key additive for Flame Retardant VALOX™ PBT and CYCOLAC™ ABS resins, makes it necessary for SABIC to issue a price increase for these resins:

- VALOX™ Flame Retardant PBT Resins: +1.00 \$/kg
- CYCOLAC™ Flame Retardant ABS Resin: +1.00 \$/kg

Importantly, this announcement and the factors that give rise to this price increase are independent of the new trade tariffs being imposed by the United States and elsewhere.

Your SABIC sales representative will contact you in the coming weeks to discuss the impact it will have for your portfolio and to answer any questions that you may have.

These increases will be effective for all shipments made on or after May 19, 2025. Please adjust your purchase orders to reflect this new pricing.

We thank you for your business and look forward to continuing to serve your engineering thermoplastics needs.

Yours sincerely,

Kevin A. Fraser
